WRITTEN OPINION OF THE
INTERNATIONAL SEARCHING AUTHORITY

International application No.

PCT/JP2004/004618

Box No. V

Reasoned statement under Rule 43bis.1(a)(i) with regard to novelty, inventive step or industrial applicability;
citations and explanations supporting such statement

Document 4 describes that a clock generator is provided in a transmitting/receiving device; the reception symbol clock generated in a demodulating part is input to the said clock generator, and the clock output from the said clock generator is output to a base-band processing part and a signal processing part.

Accordingly, the subject matters of claims 4 and 11 do not appear to involve an inventive step in view of documents 1-6.

Claims 7, 8, 14 and 15

Generating a clock by free-running oscillation is a commonly used technology in the field of oscillators.

Accordingly, the subject matters of claims 7, 8, 14 and 15 do not appear to involve an inventive step in view of documents 1-6.

Claims 5, 6, 12 and 13

The subject matters of claims 5, 6, 12 and 13 are neither described in any of the documents cited in the ISR nor obvious to a person skilled in the art.
